

# Step-by-Step Tutorial Connecting your Android to EDUROAM

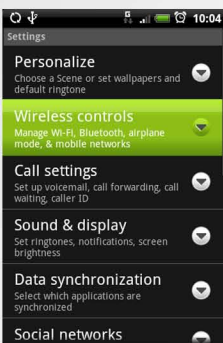

**1. Desktop**  
Go to Your Applications Menu. This could be different from every Android device.

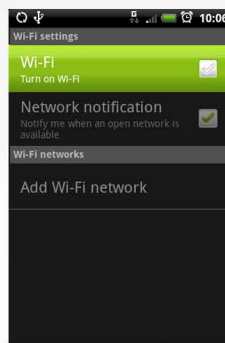

**2. Settings**  
Tap "Settings" from the programs Menu.

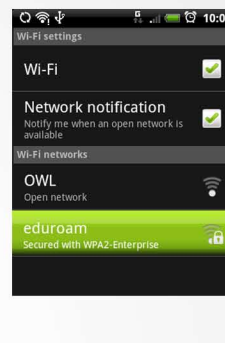

**3. Wireless Controls**  
Tap "Wireless Controls" in your Settings Menu.

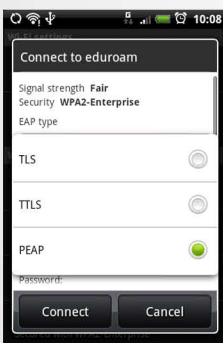

**4. Wi-Fi Settings**  
Tap "Wi-Fi Settings".

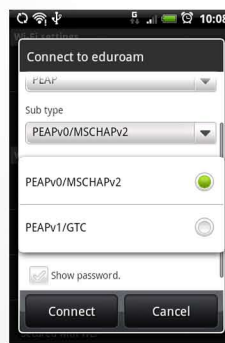

**5. Enable Wi-Fi**  
Tap Wi-Fi to enable Wi-Fi support - the list of networks will become populated.

**6. Tap Eduroam**  
Tap the eduroam entry in the list

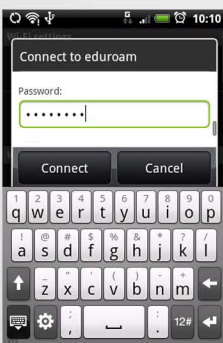

**7. EAP to PEAP**  
Change the EAP type to PEAP

**8. MSCHAPv2**  
Tap to set the Sub-Type to PEAPv0/MSCHAPv2 (this ought to be the default)

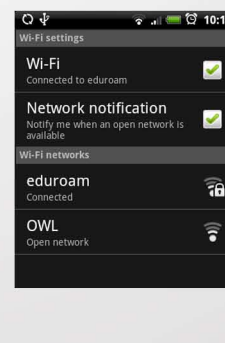

**9. Username**  
Enter your Remote Access Account username followed by your domain (ex: student@esec.pt)

**10. Password**  
Enter your Remote Access Account Password in the Password field

**11. Connect!**  
Hit the Connect button

**12. Success!**  
Wait a little while (sometimes it takes about a minute) until the message "Connected to Eduroam" appears.
